

MOHD FAISAL

Flutter Developer / Software Engineer

+91 7839309007 | faisalmohd7839@gmail.com | [Portfolio](#) | [LinkedIn](#) | Noida, Uttar Pradesh, India

PROFESSIONAL SUMMARY

Flutter Developer with 4+ years of professional experience building high-performance, production-ready mobile applications. Published multiple apps on the Google Play Store and Apple App Store with 10,000+ cumulative downloads. Proficient in Flutter, Dart, Firebase, GetX, BLoC, Provider, and AI/ML integration using MediaPipe and custom ML models, with additional experience in React.js and n8n workflow automation. Backed by experience at HCLTech providing exposure to cloud deployment, REST APIs, and backend integration — enabling a well-rounded, full-stack development perspective.

KEY ACHIEVEMENTS

- Developed and published 6+ production-ready mobile apps with 10,000+ cumulative downloads across the Google Play Store and Apple App Store.
- Improved application performance by reducing app load time by 25% through optimized Flutter and Firebase integration.
- Improved user satisfaction by 30% and achieved higher app store ratings across deployed applications.
- Integrated real-time AI/ML features using MediaPipe and Google Teachable Machine for gesture and vision-based user interactions.
- Delivered production apps with modular BLoC/GetX/Provider architecture, ensuring scalable, testable, and maintainable codebases.

PROFESSIONAL EXPERIENCE

Software Engineer | AV Management — Patiala, Punjab, India — 147001 | Aug 2026 – Present

- Develop mobile applications using Flutter, Firebase, and REST APIs, applying state management tools such as BLoC, GetX, and Provider.
- Build and maintain web applications using React.js, including the company website (avmanagementpvtltd.com), and deployed the Agent Portal Flutter app to the Play Store.
- Design and implement n8n automation workflows, including a WhatsApp auto-reply agent that captures and stores user responses.
- Work directly with clients and stakeholders to gather requirements and deliver full-cycle mobile and web solutions from architecture through deployment.

Analyst | HCLTech — Lucknow, UP, India | Sep 2023 – Aug 2026

- Developed and maintained internal mobile application interfaces using Flutter, delivering UI components and feature updates for enterprise tools.
- Integrated Flutter frontend modules with RESTful backend APIs hosted on AWS, using S3, API Gateway, and Lambda for backend connectivity.
- Collaborated with backend and cloud teams on API contracts and authentication mechanisms (JWT, OAuth), and supported issue triage via ServiceNow and AWS CloudWatch.
- Participated in Agile sprints, contributing to mobile feature planning, code reviews, and cross-team technical discussions.

Associate Software Engineer | Elint Minds — Mohali, Punjab, India | Sep 2022 – Sep 2023

- Developed and launched 4 production-ready mobile applications using Flutter and Dart, achieving 10,000+ downloads and improved app store ratings.
- Implemented scalable frontend features using GetX and BLoC state management for responsive, high-performance apps.
- Integrated AI/ML-driven features using MediaPipe and Google Teachable Machine, along with Firebase services (Authentication, Firestore, FCM, Storage) and third-party APIs.
- Built reusable widget libraries and collaborated with backend developers on Node.js and MongoDB APIs for seamless frontend integration.

PROJECTS

AV Management – Corporate Website — React.js | [AV Management](#)

- Designed and deployed the official corporate website for AV Management using React.js, showcasing company services and strengthening online presence.

AV Management – Agent Portal App — Flutter + Firebase + APIs | [Play Store](#)

- Built and deployed the Agent Portal mobile application using Flutter, Firebase, and REST APIs to streamline agent operations and internal workflows.

Innoable – AI Accessibility App — Flutter + Firebase

- Built an AI-powered accessibility app for deaf and blind users with gesture recognition, voice interaction, emergency calling, and volume-button login.
- Integrated Python-based AI models via backend APIs for real-time sign language detection, custom image recognition, and chatbot support.

Veto – The Polling App — Flutter + Firebase + BLoC

- Designed and launched a real-time polling app with location-based polls, likes/comments, smart sharing, and push notifications using BLoC architecture.
- Implemented auto-location detection, detailed poll history, and seamless Firebase Firestore sync — live on the Google Play Store.

T. Dolly — Flutter + Firebase + APIs | [Play Store](#) [App Store](#)

- Built and deployed a cross-platform mobile app using Flutter, Firebase, REST APIs, and modular state management, published on both Google Play and the Apple App Store.
- Integrated an n8n-powered WhatsApp auto-reply automation bot to handle and store user responses in real time.

Libwana.net — Flutter + Firebase + APIs | [Play Store](#)

- Developed an SMS-based communication app using Flutter and Firebase, integrating REST APIs and state management for reliable messaging.

Libwana Marketplace — Flutter + Firebase + APIs | [Play Store](#) [App Store](#)

- Built a marketplace mobile application with Flutter and Firebase, featuring listings, user interactions, and API-driven data handling; live on Google Play and the App Store.
- Integrated an n8n-based WhatsApp auto-reply bot to automate customer responses and store user interaction data.

The Zahra Trust — Flutter + Firebase | [Play Store](#) [App Store](#)

- Developed a Flutter-based mobile application for The Zahra Trust, integrating Firebase services and REST APIs for a smooth, reliable user experience.

Examerly — Flutter + Firebase + APIs | [Play Store](#) [App Store](#)

- Built and deployed the Examerly mobile app using Flutter, Firebase, and REST APIs, delivering exam/assessment-related functionality with a clean, responsive UI.

TECHNICAL SKILLS

- **Mobile Dev:** Flutter, Dart, Android Studio,GetX, BLoC, Provider, Material Design
- **Web:** React.js
- **Firebase:** Authentication, Firestore, Realtime Database, FCM (Push Notifications), Storage
- **AI / ML:** MediaPipe (Hand Landmark Detection), Google Teachable Machine, Google APIs
- **Automation:** n8n Workflow Automation (WhatsApp chatbot agents)
- **Backend:** Node.js (Basics), Express.js (Basics), REST API Integration, MongoDB, MySQL
- **Cloud:** AWS S3, API Gateway, Lambda — for mobile backend connectivity
- **Languages:** Dart, Java
- **Tools:** Git, GitHub, VS Code, Postman, Android Studio, Google Play Console, ServiceNow, PAM, AWS CloudWatch, AWS CloudTrail
- **Principles:** OOPs, SOLID, Modular Architecture, Agile/Scrum

CERTIFICATIONS

- The Complete Flutter and Dart – Udemy
- Flutter Full Stack Development (Flutter, Node.js, Express, MongoDB) – Udemy
- Mobile App Development Capstone Project – Coursera
- Flutter Fundamentals – Infosys Springboard
- AWS Certified Developer – Associate (demonstrates cloud deployment understanding)

EDUCATION

Master of Computer Application (MCA) | Maharishi University of Information Technology, Lucknow, India | *June 2024 – June 2026*

Bachelor of Computer Application (BCA) | University of Lucknow, Lucknow, India | *Sep 2020 – Sep 2023*
